MILESTONE

1982

Huida's pre-existence—Huangge Zhuang Ceramic Factory was established.

1992

Huida's first fuel oil tunnel kiln was up and running.

1994

Huida brought in the full implementation of Vertical Casting technique.

1999

Huida's first gas tunnel kiln was up and running.

2000

Huida was confirmed as "the appointed Water Conservation Ceramic Production Enterprise" by National Building Material Bureau and the Ministry of Construction.

2005

The president of Huida Wang Huiwen was awarded the national model worker.

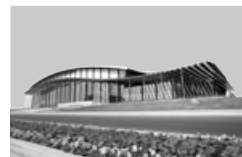

2006

As the only building material company, Huida was selected to take part in the event of "Long March of Brand" and obtained the China Environmental Labelling Certificate.

2008

The production of Huida was utilized by the Chinese National Stadium and other seven gymnasiums of Olympic Games & The president of Huida Wang Huiwen was elected as the member of 11th National People's Congress.

2010

The first phase of Huida International Home park was up and running and the 4.8 liters super water-saving product was developed succeed.

2011

As a member of the trade delegation of China, president of Huida wangyanqing visited America together with Chairman Hu Jintao.

2013

Huida was entitled as "National-Certified Enterprise Technology Tenter" by the State Development and Reform Commission, the National Technical department and the State Administration for Taxation.

2015

In 2015, wu xiaobo, a financial writer, and wang yangqing, President of Huida, made an in-depth discussion on the road to China's manufacturing transformation

2017

Huida sanitary ware successfully listed on the main board of Shanghai stock exchange, brand development and upgrading.

2018

Huida sanitary ware issued the strategy of decoration, the unit bathroom project started, the official establishment of Huida Living, the first to open the domestic whole sanitary ware market.

1995

"HUIDA" was confirmed as a brand of Huida Group.

2001

Huida's post-doctoral workstation was approved by China Enterprise Confederation and established.

2002

Huida developed its self-cleaning glaze, which reached advanced world level.

2007

Huida attended the "China in Russia" year and the National Exhibition of China

2009

Premier Wen Jiabao inspected Huida and the product of Huida was utilized by the construction of 2010 Shanghai World Expo.

2012

Huida was entitled as "National Housing Industrialization Base" by Ministry of Housing and Urban-Rural Construction of People's Republic of China.

2016

In 2016, Huida was evaluated by the world brand lab as "the most valuable brand in China in 2016", and the brand value was assessed at RMB 151.96 billion yuan.

2019

Huida became a special sponsor of the Beijing expo.

DESIGN

Deconstruction function design aesthetics, extend artistic tension, create art of life. Huida aims to create a healthy, comfortable and high-quality life, and integrates the sense of design, comfort and feelings of products, constantly seeking better solutions, so that you can have a pure pleasant experience every minute in the bathroom.

NATURAL

The overall design concept is simple and oppose too flashy decoration, which perfectly combined nature and simple sense.

storage space

more storage space,meet your storage needs.

Multiple glazing. Uniform color with thick texture, not easy to get dirty, easy to clean. One molding, high temperature firing, strong and durable. Not easy to seepage, bacteria-free.

CF AWARD 2019

Diamond shape

The diamond shape on the skirt makes the product look high-grade and unique, which is the first in the industry.

Elegant and concise

Put the diamond cutting effect into the bathtub skirt design. Geometric diamond cutting surface, highlighted the quality appearance, perfectly combined nature and quality sense. Seamless splicing technology, which make the bathtub looks like integrally formed, elegant and concise.

Butt joint seamless bathtub, no butt marks, looks like one molding, neat and beautiful and easy to clean

INTELLIGENT TOILET

EVERYTHING TO
BE CLEAN

CLASSIC STREAMLINE DESIGN THE OVERALL SHAPE OF NATURE

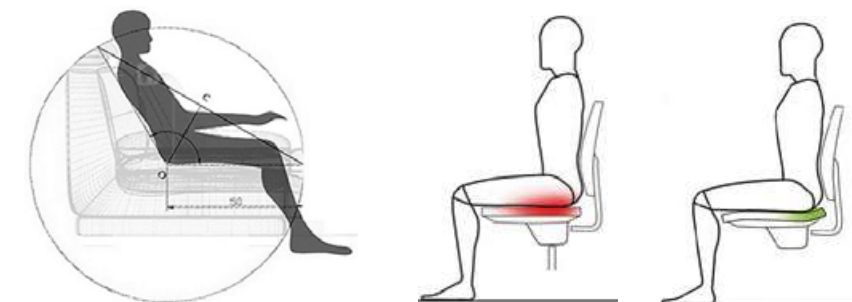

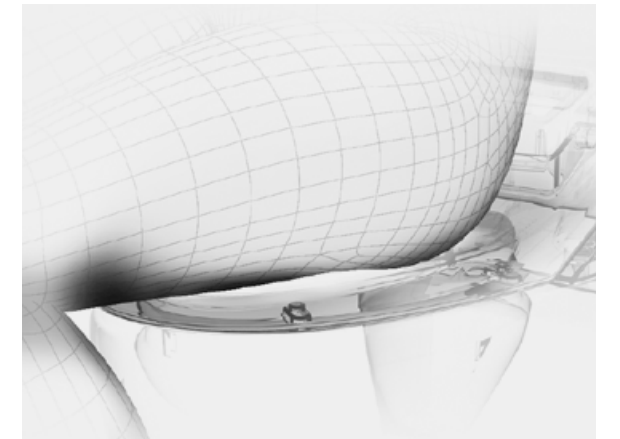

In order to realize the integrated design of seat and upper shell, new hardware and hardware stacking technology are adopted to realize the smooth and smooth connection between seat and upper shell, to ensure simple appearance and convenient cleaning, and to prevent the growth of bacteria.

With advanced technology, the seat thickness is controlled at 20mm to ensure rapid heating and seat comfort while making the overall appearance more integrated.

ERGONOMIC SEAT DESIGN

In order to make the seat circle present the most comfortable sense of sitting, through a lot of design and experiment, we find the most comfortable balance point in the process of constant modification, the overall shape conforms to the curve of human hips, and minimize the seat circle's pressure on the legs, so as to be suitable for different people and enhance the comfort of sitting.

In the process of constant modification to find the most comfortable balance point, the overall shape of human hip arc

VISUAL STATUS KNOB

Knob can show the current working condition, will express the different function through the different color, lets the toilet culture also have the colorful life.

HUIDA

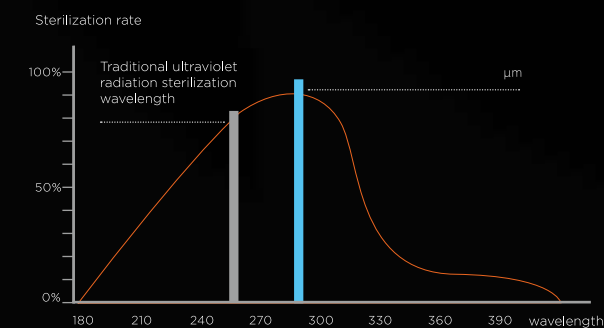

ULTRAVIOLET RADIATION STERILIZATION

Ultraviolet sterilization has the features like high efficiency, environmental protection, energy saving, reliability, long service life, non-toxic, no residue, no peculiar smell, no resistance of cell and virus protein shell, and etc, which is especially suitable for air, water and surface sterilization.

ULTRAVIOLET SPRAY HEAD DISINFECTION

3minutes of ultraviolet spray head disinfection, the sterilization rate of *ecoli*, *staphylococcus aureus*, *candida albicans* >99.99%.

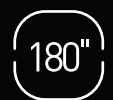

Ultraviolet sterilization rate curve

Ultraviolet radiation sterilization nozzle

Nozzle 180° ultraviolet sterilization

Super long 180° ultraviolet sterilization

NEW WORLD OF HEALTH

Uv sterilization nozzle, clean inside and outside, avoid cross infection, use more assured.

ANTIBACTERIAL SPRAY HEAD

Nano silver ion coating spray head, effectively restrain the Escherichia coil, staphylococcus aureus, candida reproduction.

NOZZLE SELF-CLEANING

Automatic nozzle cleaning procedure means that before and after using, automatically clean the nozzle to ensure that the nozzle surface is cleaning and sanitary.

WARM WATER TO CLEAN

The gentle flow of water gives you a whole new bathroom experience, and it's hard to just use toilet paper after you've washed-- changing your life from washing. Constant temperature, instant heating, gentle water let you keep clean, the refreshing feeling of a woman is better than a man-- love her, start from the water, from the inside out to be a delicate woman.

900 CC/MIN INFINITE FREQUENCY CONVERSION FLUENT WASH

Independent research and development of intelligent frequency conversion constant temperature control system, has a microcomputer to extract water temperature, flow rate and water outlet temperature and data changes,with frequency conversion speed of thousands of times per second to regulate the heating system energy consumption,achieve energy-saving effect, and effectively reduce the energy consumption.

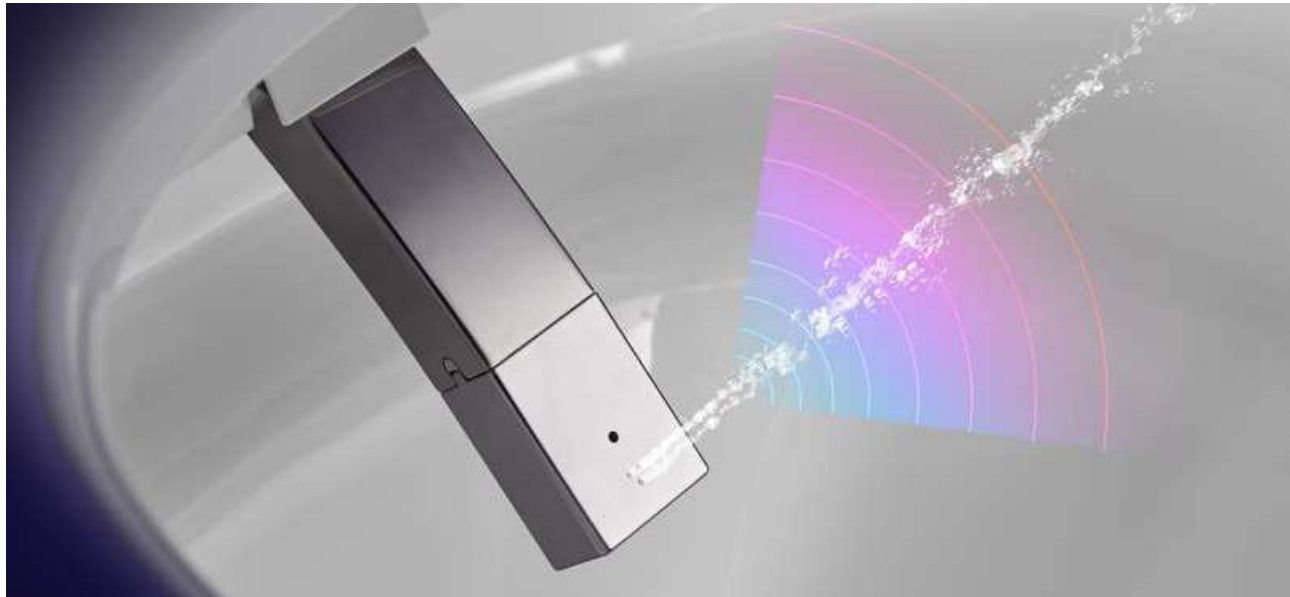

CONSTANT TEMPERATURE AND ENERGY SAVING

Intelligent frequency conversion technology is adopted in order to realize constant temperature water outlet, clean and comfortable, more energy saving and environmental protection.

DIVERSE WASHING, SITTING WHILE ENJOYING HEALTH

More water outlet function let you fully immersed in water pleasure, break through the traditional clean concept, which is healthier, cleaner and more comfortable.

COLD AND HOT MASSAGE CLEANING

Adopt circular stimulation of hot water for 15 seconds and cold water for 5 seconds, to experience new clean feeling.

MOVING CLEANING

Antibacterial nozzle can set the adjustable position function and can be moved back and forth according to the using needs, to accurately capture the cleaning parts and ensure the cleaning effect.

MASSAGE CLEANING

The effect of skin massage can be achieved through adjusting the cleaning pressure; add the stereo massage for more perfect cleaning, three-dimensional massage includes: water pressure, moving cleaning, cooling and heating, and it can promote the blood circulation of the muscle and relieve muscle tension.

AIR BUBBLE CLEANING

Inject the clean water into air through the air pump to form water bubbles, not only soft and comfortable, but also can fully wash and massage the skin, to reduce water consumption and at the same time ensure better cleaning effect.

STRONG CLEANING

Develop 900cc/min large flow frequency conversion instant heating strong cleaning function, to ensure quicker and cleaner cleaning.

ANTIBACTERIAL SEAT

Nano silver ion seat ring, has strong antibacterial effect, safe and healthy, and effectively restrain bacterial growth and greatly improve the quality of people's lives.

Antibacterial layer
(insulation layer)

Uniform heat
conduction layer

Heat source layer

Insulation
bottom cover

WATER SOURCE FILTER, DEEP PURIFICATION

The water quality filter is adopted to effectively intercept the harmful material such as the sediment, plankton, cochineal and etc, to guarantee deep purification of the rinse water.

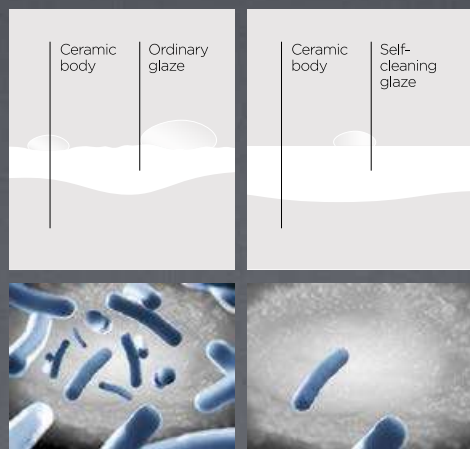

PP cotton net
filter element

SUPER CLEAN SELF-CLEANING GLAZE

Super smooth bottom glaze+nano composite self-cleaning glaze for double layer sterilization, full automatic manipulator for glazing for keep the glaze even and bright, which effectively prevent the surface dirt build-up and bacterial growth.

Antibacterial surface coating, effectively reduce the growth of bacteria

WARM AS SPRING

Warm as spring, let the four seasons change outside the window, home always like spring breeze

SEAT RING HEATING

Seat ring temperature can have three grades for adjustment: low, medium and high-grade(the default temperature is medium), when seat ring temperature is significantly lower than the human body temperature, intelligent induction will heat the seat ring; and the application of low temperature anti-burning technology is extra carefree.

WARM AIR DRYING

Fuzzy control technology is adopted, and warm air temperature can have three-grade adjustment from room temperature to -55℃, and the outlet air temperature is variable according to external environment temperature to avoid too cold or too heat situation during use. Dry the residual water on the hip with comfortable warm air to make the cleaning area more clean and dry.

ANION DEODORIZATION

Built-in anion generator can effectively kill bacteria, purify air, and eliminate peculiar smell from the sources, to let you enjoy pure and fresh sanitary life.

SOFT LIGHT AT NIGHT

The environmental protection and energy saving LED light source is adopted for lighting, not only meeting the needs for toilet at night, but also avoiding embarrassment for difficult sleep after toilet in strong light.

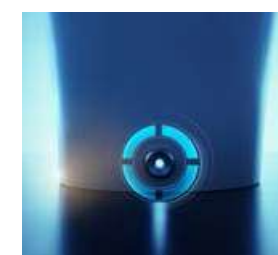

INTELLIGENT OPERATION MODE

Intelligent operation mode: Change numerous to brief, more intelligent, more comfortable, with multiple protection, full intelligent operation, and carefree life, safe and careless, to provide you with high quality life.

INTELLIGENT REMOTE CONTROL

Use infrared or wireless sensing technology, with complete function, easy operation, and sensitive response, for more convenient use.

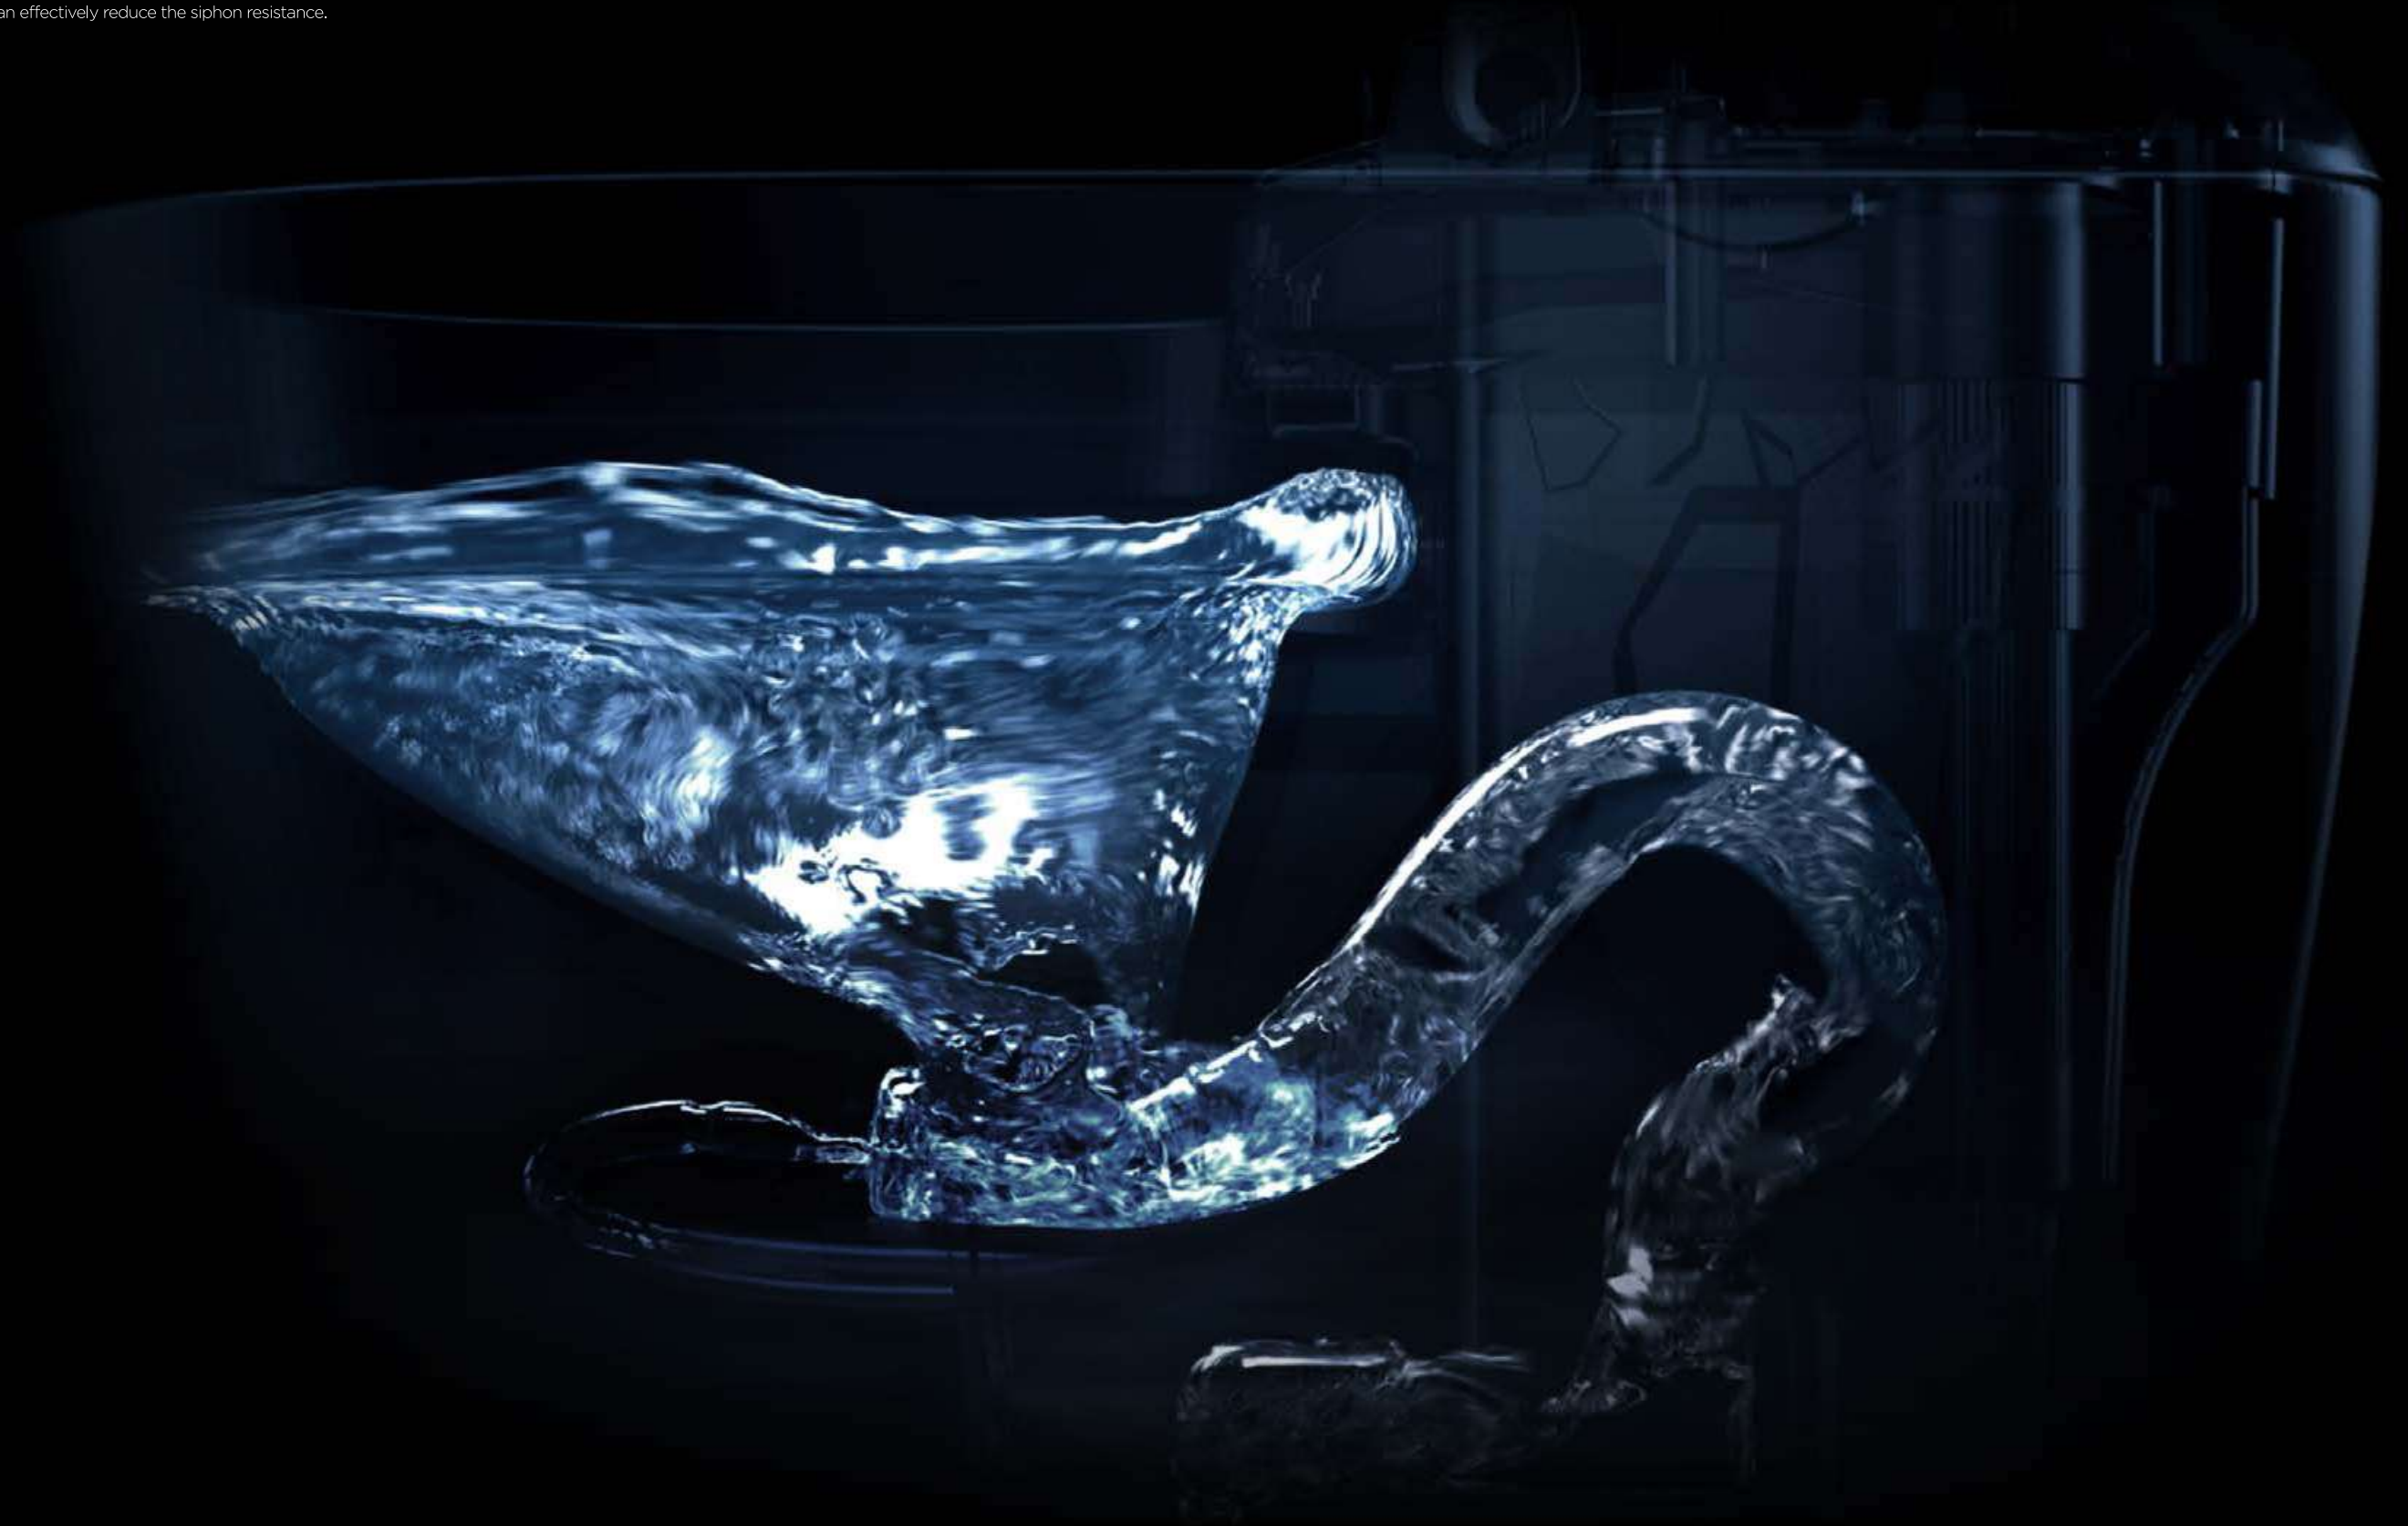

FOOT TOUCH FUNCTION

Free your hands and touch with foot tightly after use to realize the flush function, with more simple and convenient operation. Foot touch can achieve the foot touch flip cover, flip ring and function in turn.

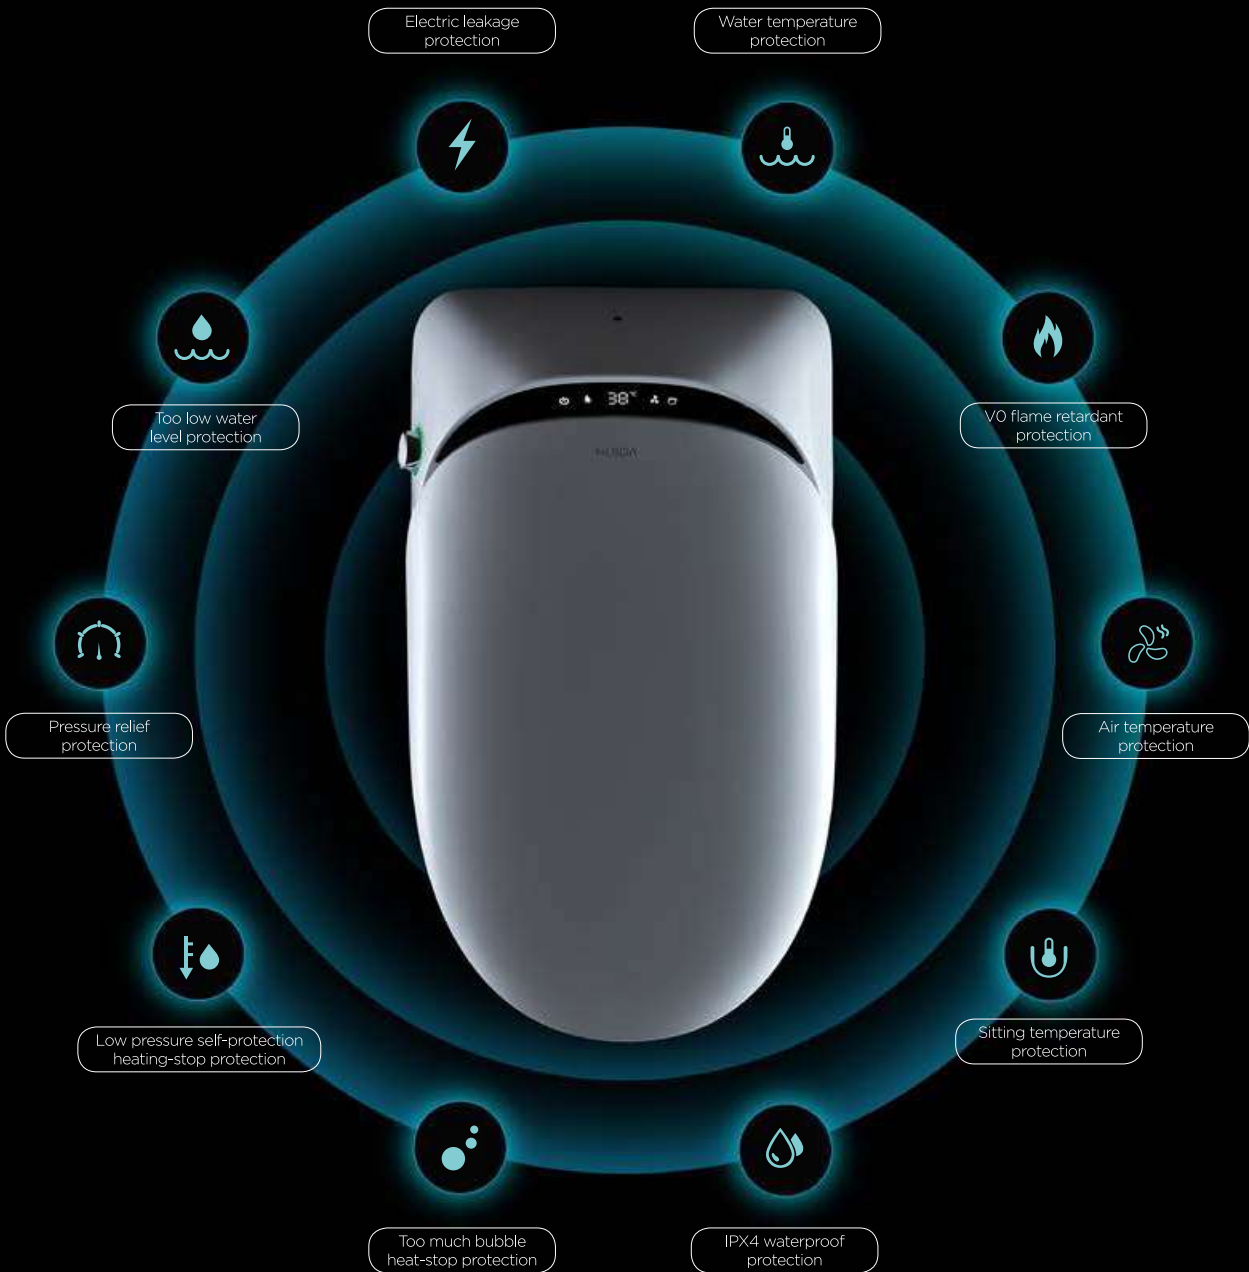

FLUSHING TECHNOLOGY

The potential energy of single column water is released instantly and circulates along the inner wall , forming 360° vortex water flow and scour in all directions, supplemented by the super-large sewage pipe and scientific jet port, which can effectively reduce the siphon resistance.

NEW UPGRADE OF ALL-POWERFUL SECURITY SHIELDS

Continuous innovative research and development technology, excelsior manufacturing process, ten new upgraded intelligent technology care, ensures 100% safe protection.

NEW UPGRADE OF ALL-POWERFUL SECURITY SHIELDS

Electric leakage protection

When the leakage current reaches 0.01 amperes, the system automatically cuts off power within 0.1s to prevent electric shock to human body.

Pressure relief protection

When pressure exceeds 0.18MPa due to abnormal water network, the product will automatically release pressure.

Too much bubble heat-stop protection

When the flow is more than 1200ml/min, stop the water heating, to prevent the damage of product due to too much water bubble.

Low pressure self-protection heating-stop protection

When the flow rate is less than 350ml/min, stop heating to prevent dry burning.

Abnormal water temperature heat-stop protection

When the water temperature rises over 43℃, immediately stop heating, the water source will be cut off when the temperature is more than 45℃ prevent burns.

IPX4 waterproof protection

IPX4 waterproof protection

Air temperature protection

When the warm air temperature exceeds 45℃, drying stops heating to prevent burns.

Sitting temperature protection

When the seat ring temperature is more than 43℃, automatically stop heating, the thermal fuse protection starts when the temperature is more than 73.

Too low water level protection

When the water level is too low, automatically cut off the power to prevent dry burning.

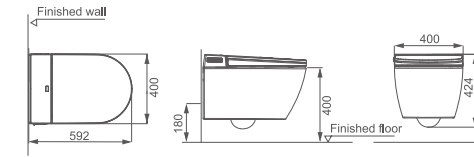

VO flame retardant protection

VO grade flame retardant fire-proofing grade.

UNIT BATHROOM

ENJOY EVERY MOMENT
OF LIFE

UNIT BATHROOM

Huida Unit Bathroom is a fabricated construction unit, which is with washing, toileting, bathing and other sanitary facilities and also with storage, ventilation and illumination functions, its waterproof plate, wall panel and roof are pre-manufactured by SMC material in the factory

and installed at the site by dry construction method. Not relying on the existing walls, the unit bathroom is built through the reliable physical connection to construct a stable and independent waterproof structure, the lifetime of it is 20 years.

THE ADVANTAGES OF UNIT BATHROOM

1. Fast installation. Dry construction method like building blocks, Only 2 men 4 hours for installation.

NO TILES
WORK

NO EMBED
PIPELINE

NO WATERPROOF
WORK

NO BRICKLAYER
WORK

NO WORRIES
ABOUT AFTER
SERVICE

2. Reduce the construction cost effectively

Traditional Bathroom		Huida Unit Bathroom
16^{days} Construction period	→	4^h 4 Hours
Manpower	→	2 Men only
Transport times	→	1 time transport only
Noise&Dust pollution	→	Low decibel noise Without water and Dust pollution

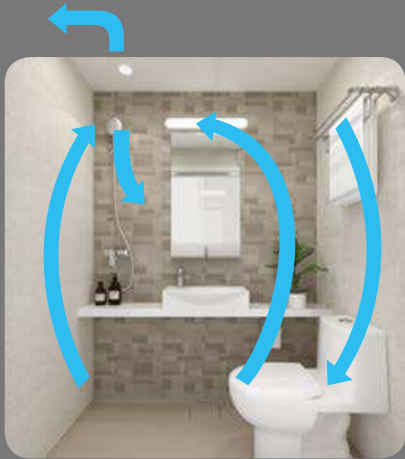

3. Environmental friendly and power saving.

Traditional Bathroom		Huida Unit Bathroom
→		Water saving 90%
→		Power saving 47%
→		CO2 release.Only 14% of traditional bathroom's

DESIGN CONCEPT

1 Storage design

2 Ventilation system design

3 Waterproof design

4 Thermal environment design

5 Antiskid design

6 Luminous environment design

TECHNOLOGY

Standard molding,integrated forming waterproof plate, good waterproof performance and stable quality.
With 12 % accurate drainage slope for unimpeded drainage,there is no water ponding on the floor,easy for cleaning.

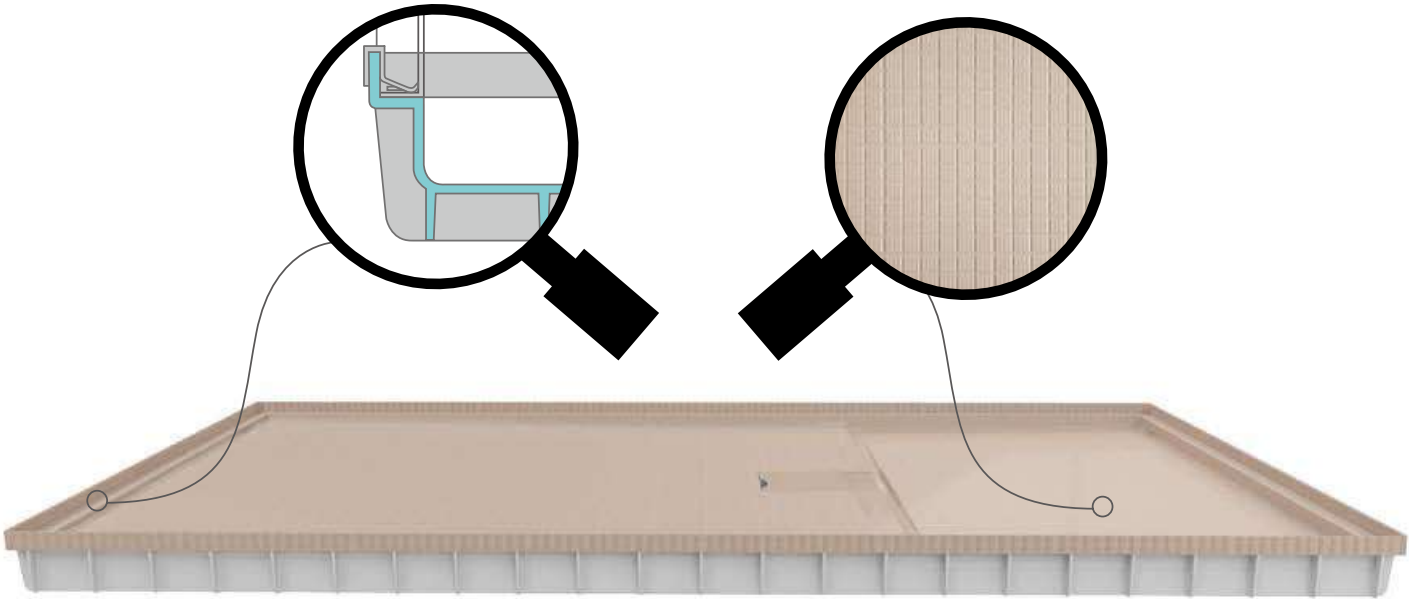

Water ponding Quick water division Quick drying

Special pattern and round corner design for water diversion can destroy the tension of water effectively,more better for drainage.

Round corner design

Special pattern design

SMC MATERIAL

SMC(Sheet moulding compound) is a ready to mould glass fiber reinforced polyester material,it widely used in electronics,aerospace,sport equipment and other fields because of its compact structure,corrosion resistance,anti bacterial,non-pollution and long service life time characters,besides that,it also with firm and flexible performance,it strong as steel,but more flexible and lighter, more gentle to touch than steel.

THE CHARACTERS OF HUIDA UNIT BATHROOM

ENVIRONMENT FRIENDLY MATERIAL,CARE FOR YOUR LIFE

Low level harmful gas release,the value of formadldehyde release meet E0 Grade.

Grade	Formaldehyde (mg/m ³)	
E0	≤ 0.5/m ³	
E1	≤ 9.0/m ³	
E2	≤ 30/m ³	

STANDARD MOLDING, STABLE QUALITY

Stable quality,hardness and without any tiny hole in the surface,no dirty things left,easy for cleaning.

HEAT INSULATION DESIGN, A WARM BATHROOM FOR YOU

The thermal conductivity of SMC is much lower than tiles,SMC bring you a warm life.

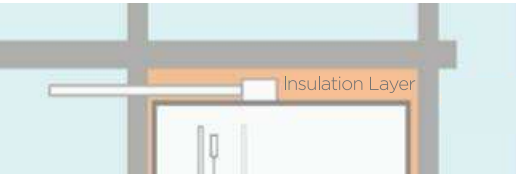

SPECIAL ANTI SKID PATTERN DESIGN

Keep floor drying rapidly and avoid slip accident effectively, more care for your safety.

THERMAL ENVIRONMENT DESIGN. SAY NO TO COLD

Between the concrete wall and unit bathroom,there is a insulation layer, it helps to lock the warm air,keep the unit bathroom warm and comfortable.

FAST WHIRLPOOL DRAINAGE

SPECIAL FILTER DESIGN

The detachable structure filter without any block trouble, beside that, it can force the hair into group, when cleaning, only need to take out the filter and knock all the waste.

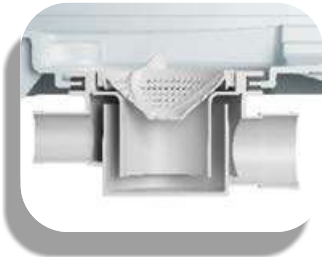

SPECIAL WHIRLPOOL DRAINAGE DESIGN

Special water diversion design, it can guide the disorder flow into whirlpool, accelerate the drain speed.

STINK SEPARATION

With 50mm thickness water seal, isolate the harsh odor and keep the air of bathroom pure and fresh.

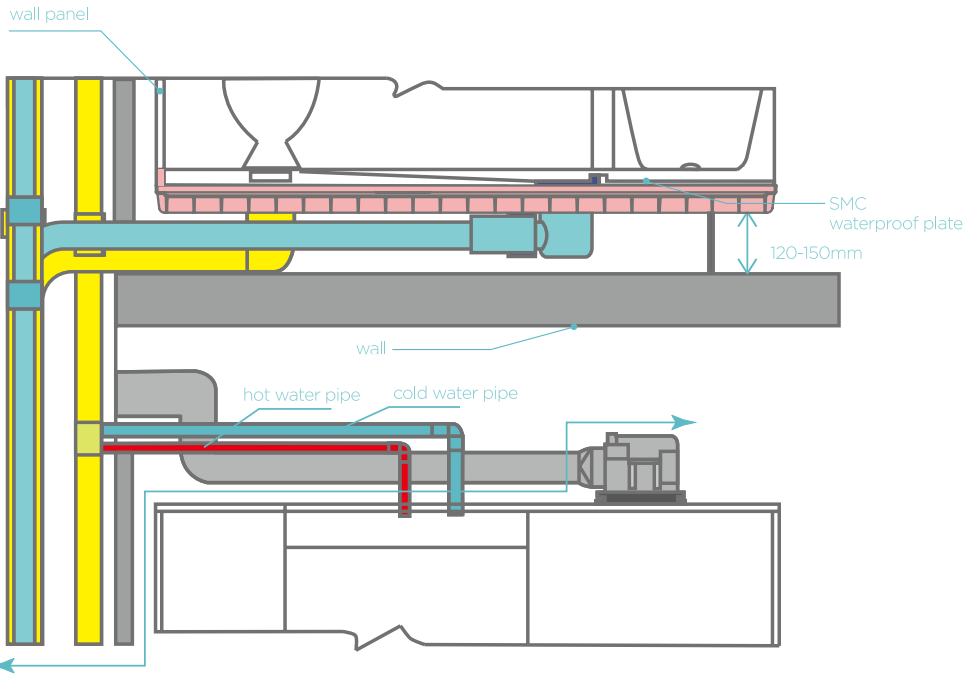

INTEGRAL STRUCTURE

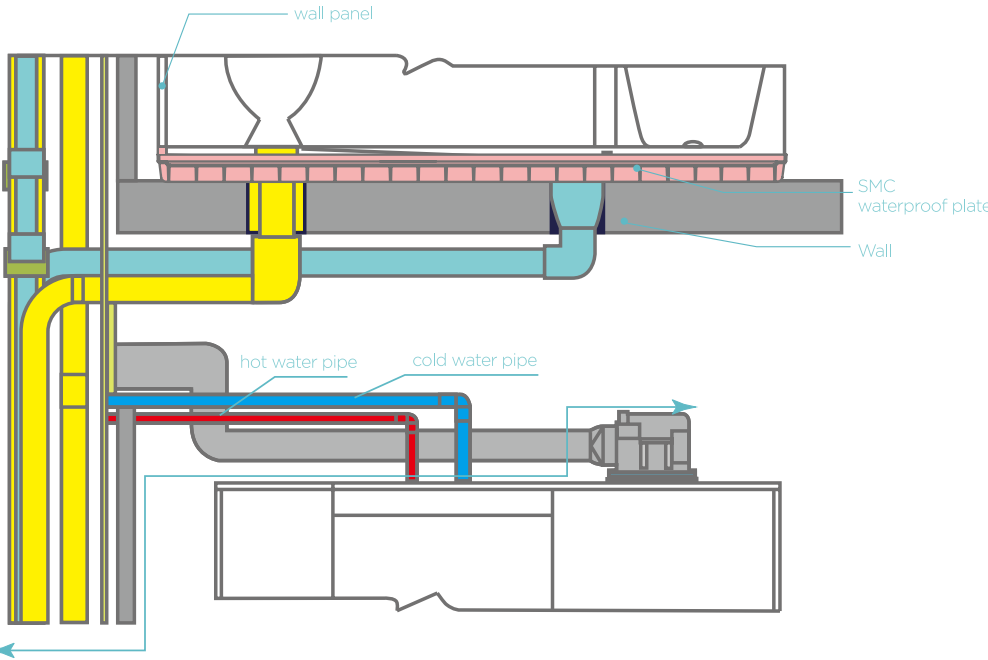

The body of whirlpool drainage is a integral formed structure, it can avoid the leakage problem which caused by the loss of the main body.

DRAINAGE METHOD

Same level drainage

Different level drainage

MATERIAL CENTER

Aeronautical material-SMC

SMC material is widely used in the cabin of airplane,the inner wall of high-speed trains,it frim and flexible,as strong as steel,but more lighter and more gentle to touch than steel.SMC material is applied to the waterproof plate,wall panel and ceiling of Huida Unit bathroom.

WOOD GRAIN PATTERN

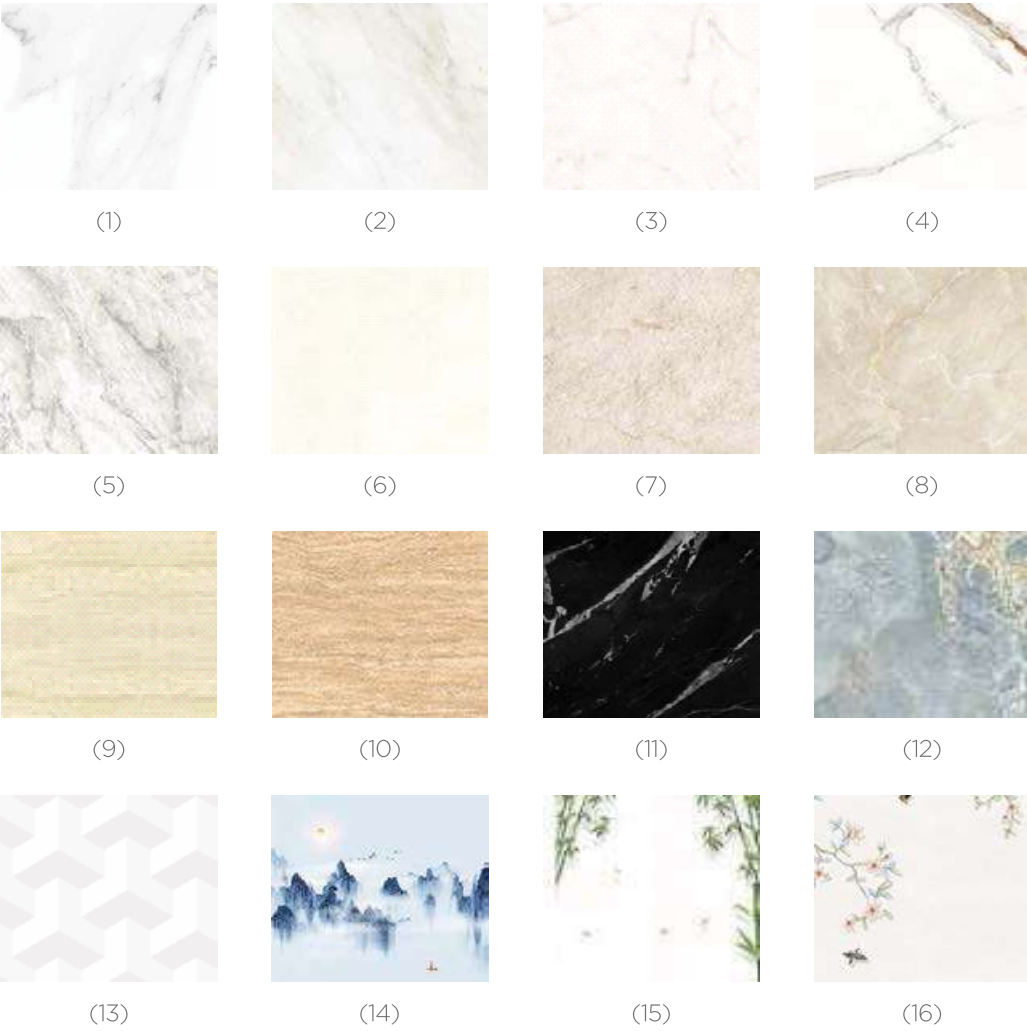

CLOTH PATTERN

VCM material Advanced simulation material-VCM

VCM is a kind of environmental friendly material, it with good corrosion resistance, bright color, beautiful appearance and the original strength of steel plate characters.

Together with the tonal contrast, the light and shade variation of space draws the outline of the conflict between traditional and modern, flaunting a scroll painting of sanitary life, using a unique way to explain its unique understanding of sanitary life.

ART

The symmetric beauty of black and white creates a classic space. The relentless pursuit of perfect fashion sanitary wares, as carefully as an artist handling his artwork, leads to a unique personalize product style which brings the user an wonderful use experience.

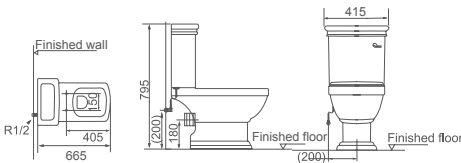

The smooth curve stirs the rhythm of your view. By using artistic symbol to decorate your daily life, it adds the charm of perceptual and rational thinking to you sanitary life.

BATHROOM FURNITURE

FASHION IS PART OF
YOUR DAILY AIR

STORAGE

LARGE CAPACITY STORAGE SPACE

Optimize the structure of the cabinet; properly divide the storage layout space, matched with the use of the mirror box, side cabinet and the platform of placing objects, so as to maximize the storage function.

DRAWER CABINET

Combined storage, and store more

DOOR CABINET

Large space and store much bigger things

LAYERED MIRROR BOX

Maximize the storage function

HIGH QUALITY MIRROR

Float process silver rglass--no copper
no copper mirror prevents moisture and air from getting behind the mirror and protects against black spots of corrosion forming around the edges.

MIRROR LIGHT DESIGN

Advanced technology and beautiful and durable.
Certification include CE; SAA ;IP44

ENVIRONMENTAL FRIENDLY

CHOICED PLATE MATERIAL SATISFY THE INDIVIDUALITY NEEDS

HUJDA bathroom cabinet material through moisture-proof treatment, moisture proof and anti-corrosion, rich plate categories can meet the needs of individuality

E0 GRADE HEALTHY PAINT

E0 grade healthy paint, 7 times of dust-free baking varnish, plump paint film is with bright colors, anti-moisture and anti-corrosion.

MORTISE AND TENON JOINT STRUCTURE

Inheriting the traditional carpentry craft, using the mortise and tenon structure to combine closely and seamlessly, it is stronger and more durable than iron nail connection, with strong stability and bearing capacity.

CERAMIC WASH BASIN

DESIGN AWARDS

ULTRA SELF-CLEANING GLAZE

Supersmooth underglaze + silver ion composite glaze, inhibit the growth of bacteria; Fully automatic manipulator glaze, glaze uniform smooth, glaze layer thickness up to 1.2mm, durable; High temperature vitrification, high density, prevent infiltration.

EXCELLENT HARDWARE ACCESSORIES

HIGH QUALITY HARDWARE FITTINGS

Excellent hardware accessories are smooth, and after 200000 times of open and close test and 72 hours of salt fog test, it is still new as before, with strong acid and alkaline resistance property, which is environmental protection and non-toxic. Mute damping system can reduce the door-closing noise, reduce impact, and protect the surface of the cabinet.

304 STAINLESS STEEL ALL-COPPER OIL BUTT HINGE

Mute damping, 72-hour salt fog test, strength is 10 times of zinc alloy, open and close test is more than 200,000 times, big open angle, gentle open and close, excellent quality, long-lasting and durable.

SILENT SLIDE RAIL OF COLD ROLLED STEEL

Cold rolled steel silent slide rail can slide easily and smoothly, 1.2m reinforced wall thickness can have maximum load bearing of 100kg, the 72-hour salt fog test, first class use experience and excellent quality can ensure long lasting and durable usage.

ONE

Metal element decorates, curve mirror frame, which created the geometrical feeling. Modern style, light luxury decoration, built a harmonious overall atmosphere. Coloured glaze gold and quiet blue, mutual alternated cool and warm color, make the distinctive oriental quiet style bathroom appears a mysterious look. Rigorous craftsmanship makes low-key luxury appearance more durable.

MAYA

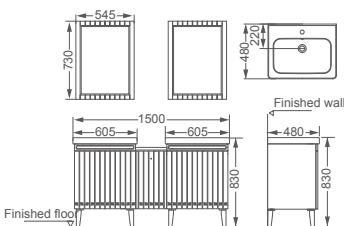

Exquisite craftsmanship, perfect quality and top-class enjoyment are all integrated into this series. To satisfy every demand of your daily life, it highlights artistic inspiration, peaceful feeling and wonderful charm. Starting with this series, you can embrace convenience and meticulous care in your daily life.

BATHTUB

LET BATH FULL OF FUN

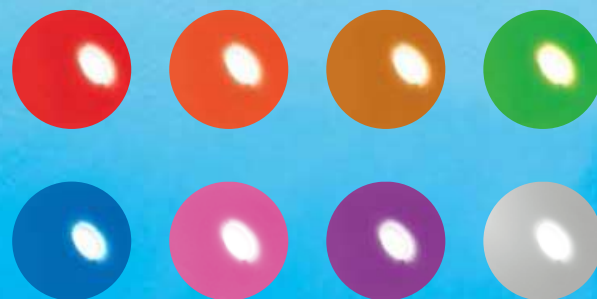

LED MAGIC LIGHTS

LED MAGIC LIGHTS

Cylinder face colour lamp and pool bottom lamp can circulate change 7 colour color, in 7 colour light ripple lets person body and mind loosen, enjoy the shower fun that light and water bring adequately.

SPA MASSAGE SYSTEM

RELAX THE MUSCLES AND RELIEVE THE PAIN

The natural and warm water flow completely hugs your body and the mind can regain the calm and satisfaction; the careful designed nozzle position gives you multiple massage experience, pointing at the human body where fatigue is often felt, to let you relax muscle and relieve pain.

THE WATER FALLS

Waterfall water injection system, more smooth water flow, less water storage time, no waiting, make the shower more enjoyable.

AIR BUBBLE MASSAGE

Water-air mixing massage system can have hydraulic massage nozzle and air bubble nozzle work together, to ensure massage infiltrate into deep skin tissue from surface, activate skin cells, achieve the goal of the whole body massage and relaxation, and make physical contact more comfortable, which is easy to clean.

SURF MASSAGE

The champagne-like bubbly bubbles rise slowly from the water, and the skin is completely absorbed in the love of the water. The changing light in water is intoxicating with the peace of mind and nature - water is not intoxicating, but people are drunk themselves.

ADJUSTABLE SURF NOZZLE

50mm pipe diameter, unobstructed 360° trap glazing, maximum smooth

QUALITY GUARANTEE

6 LAYERS COMPOSITE TECHNOLOGY

Acrylic material is polymethyl methacrylate, and the back adopts resin as the bonding material, glass fiber and inorganic filler as the reinforced material through glass fiber composite processing technology, with light weight, outstanding rigidity, clear sound when knocking the back; the surface of acrylic material is poly methyl propionate, and the back adopts resin, stone powder and glass fiber.

ABS acrylic 6-layer composite plate material

Stainless steel frame with load bearing of 200KG

Continuous test under 80° hot water has no deformation and color fading

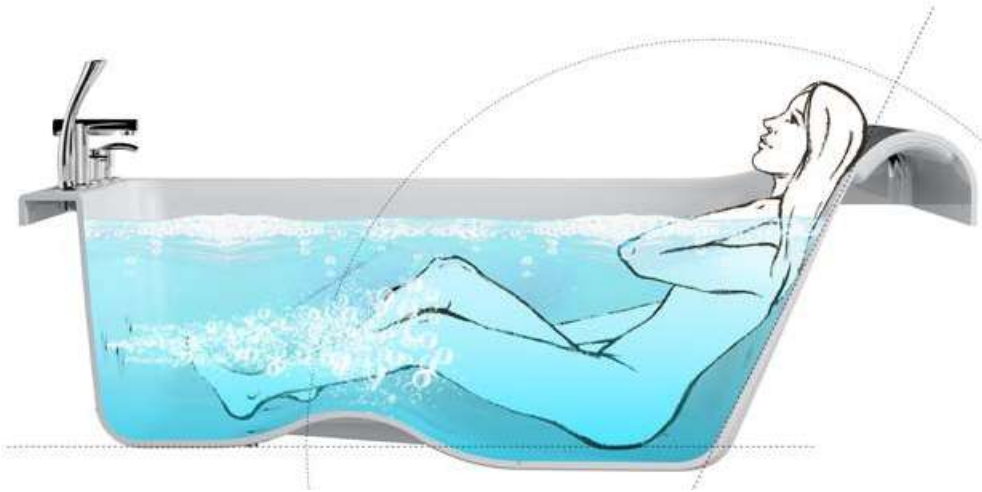

Imported resin has good heat preservation

HUMANIZED DESIGN

ERGONOMIC DESIGN

Apply Asian ergonomic principle to fit the curve of human body, 136.8° inclined design can have perfect fit with the human vertebra, to let the body and mind comfortably lie, and enjoy SPA time with completely relaxed posture.

INTEGRATED MOLDING TECHNIQUE

Break through the traditional craft, extremely simple and ultra thin integrated body needs no butt joint, and the beauty is naturally formed.

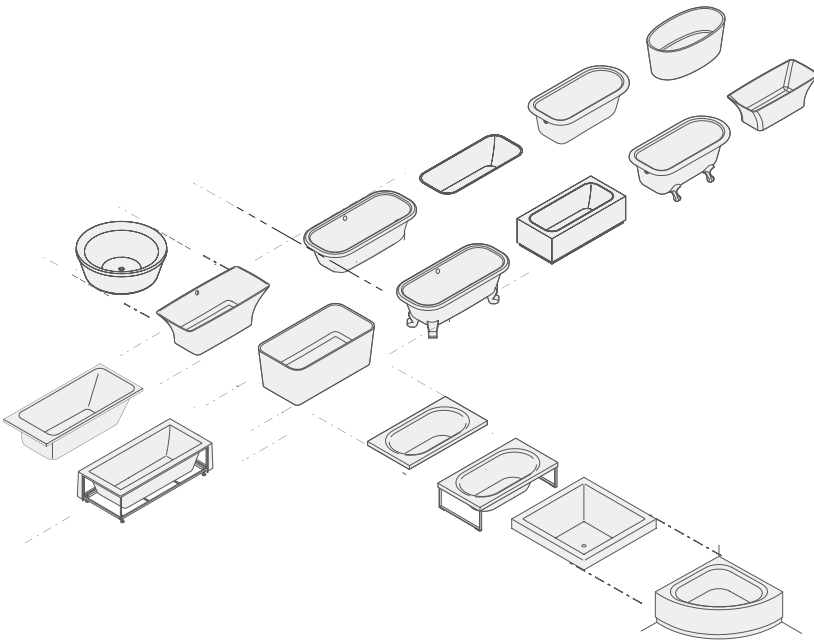

EASY CLEAN

Wipe the surface gently with dishcloth, perhaps blunt drench directly with clear water can, need not use excessive cleaner, save time save worry save effort.

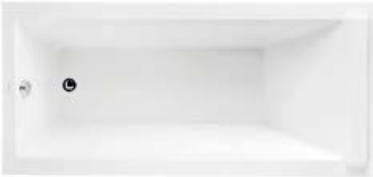

MULTIPLE SIZE OPTION

Various size design, suitable for different sizes of space environment, easy to achieve bath experience.

HD1709

Massage bathtub
Size: 1610x805x640mm
Three side panels,glass panel;
Air Button And Air Adjustment;
Powerful water massage function with 1HP pump;
2 big nozzle,8 small ultrathin jet nozzle;
High grade brass mixer and water fall;
Comfortable double backrest with rubber pillow;
10 mm tempered glass front panel;
Automatic drainage system;
Auto protection function for pump..

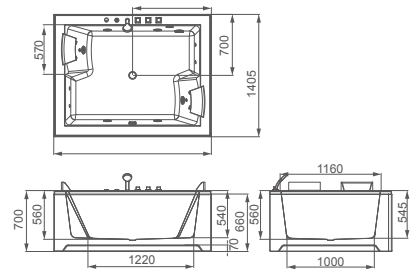

EXTRA

HD1710

Combinedbathtub
Size: 1810x1405x700mm
Drainer Optional:
1. Pop Up Waste 2. Rotate Drainer;
Faucet Optional

SHOWER ROOM

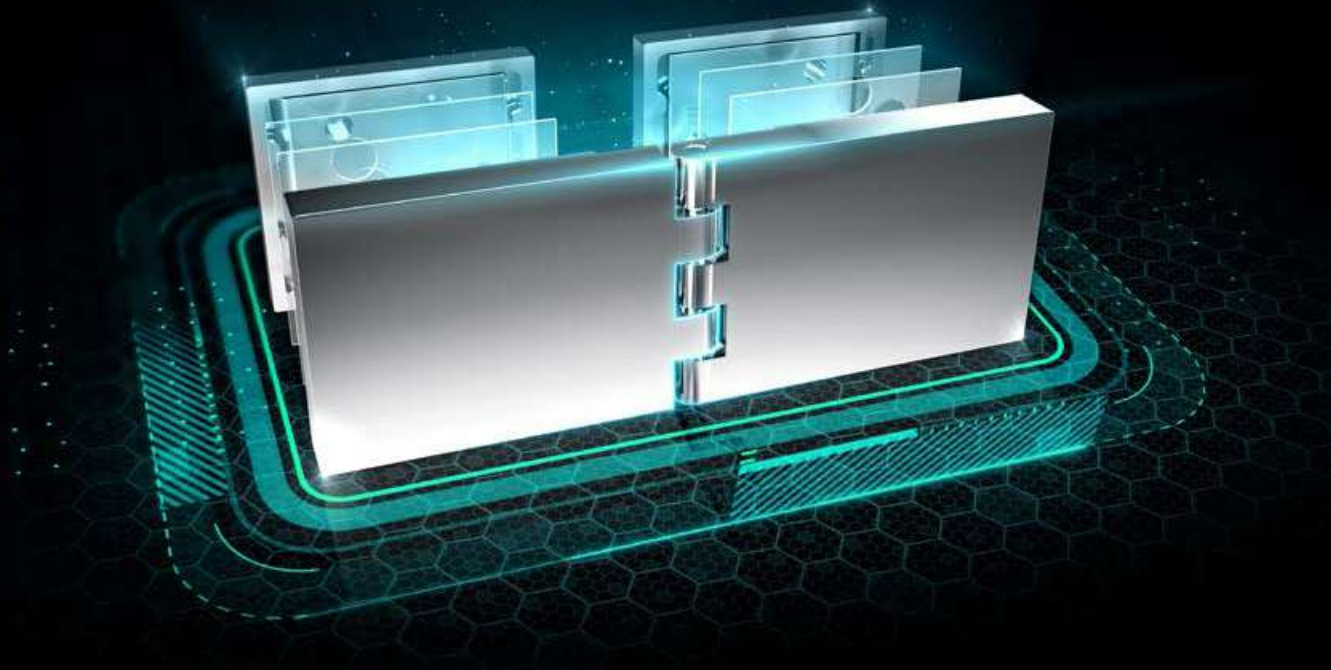

ONE DOOR TO ACHIEVE DRY
AND WET SEPARATION

EASY TO CLEAN

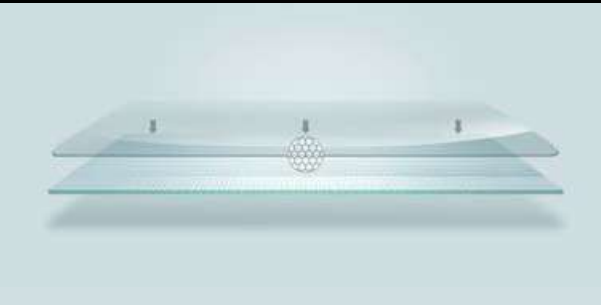

EASY CLEAN HUO SURFACE

Adopt 3+2 rotating shaft design, more than the traditional hinge support point, effective balance force, safety and stability more durable, bearing 50KG, anti fall.

SAFE EXPLOSION-PROOF, MUCH SAFER

Reinforced tempered glass + EPM high temperature resistant tempering, bring further safety protection, in addition to prevent flying debris due to glass self-explosion and accidental breakage, it can also reduce the external factors to the injury of the glass itself, to guarantee the service life.

HUMANIZED DESIGN

TO RESTORE THE ORIGINAL, CAREFULLY SELECT THE MATERIALS

To restore the original, carefully select the materials: adhere to the initial heart, adopt the high-quality profile. It can have super strong load bearing and satisfy our perfect pursuit of exquisite surface, long lasting and can ensure the safety performance and service life of the products.

AVIATION HIGH QUALITY PROFILE

The aluminum material of Huida shower room adopts the aviation high quality profile of international standard 6463-T6, and its strength, elongation, hardness and other many important indicators are better than the European standards, even custom-made non-standard large size is not easy for deformation, which effectively guarantee the product using performance and service life.

304 STAINLESS STEEL PROFILE

The touch sense of 304# stainless steel is hard and full of rich metallic texture, which is a very avant-garde and fashionable shower room material. Huda strictly complies with American ASTM standard to produce the industrial 304# stainless steel profile, with thickened design of more than 1.2mm, good bearing capacity, which is not easy to be deformed, and has strong corrosion resistance, to perfect display fine grinded 10K mirror effect, which is long lasting and as bright as new.

MORE REASONABLE AND BALANCED SUPPORT 3+2 SHAFT STRENGTHENING DESIGN

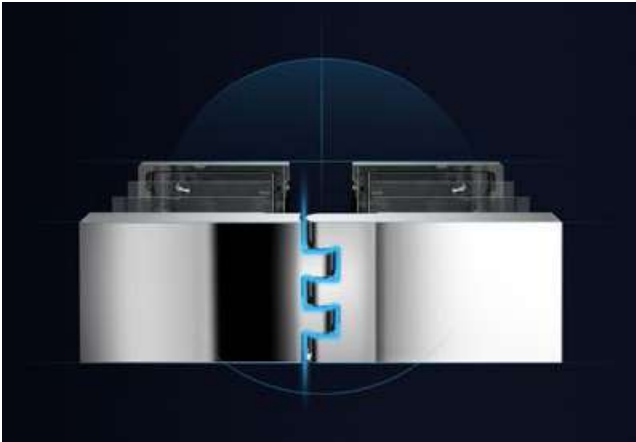

Add a support point compared to the traditional hinge, which can effectively balance the force, safe, stable and more durable.

3+2 shaft strengthening design

Load bearing of 50kg

ANTI-FOULING

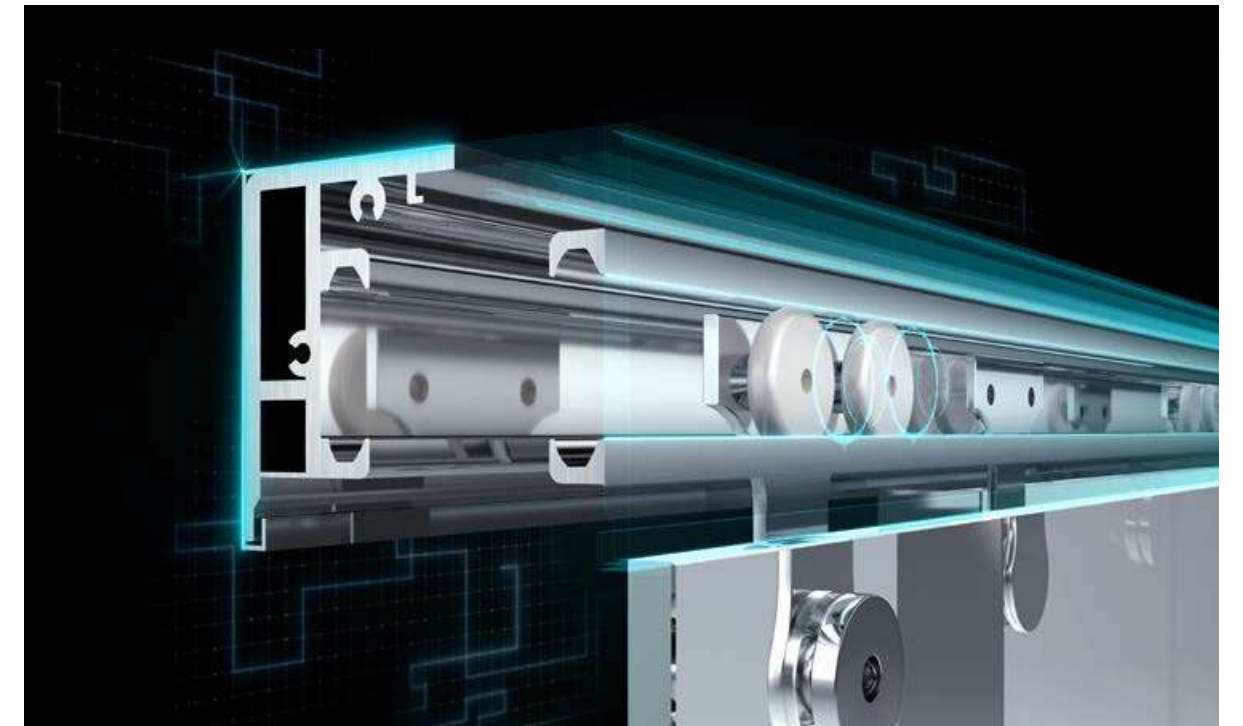

ANTI-FOULING AND INSTANT CLEANING TECHNOLOGY

Highly toughened glass has surface of high density, which is smooth and flat, and the stain is not easy to stay. The German ECOFRIEND-ING4 glass easy-cleaning curing agent, all reaches the excellent level in the aspects such as performance, efficiency, environmental protection, and etc, and ECOFRIEND-ING4 glass easy-cleaning curing agent is safe, environmental protection and free from contamination. There is no harm to human body, no side effects according to European environmental standards, and American health standards.

Special process is taken to treat glass surface of shower room, so the glass surface is smoother and easier to clean.

Common glass surface is not smooth and hard to clean, easy to have stains and bacteria adhesion, which will influence the body health.

QUIET OPENING AND CLOSING, SMOOTH FEELING

V type guide rail is smooth without derailing; dust proof design is added to protect the rail effectively, and the push pull effect will not be affected after long-term use, which is safe and durable.

Water sealing technique

Dustproof design

BUFFERING ANTI-COLLISION TECHNOLOGY

Adopt the working principle of back and forth movement of the cylinder piston, with the design of buffer damping, to let the glass slow down and buffer from high speed during the moving process to reach safe closing state, slow down the impact force and strength, improve the service life of the product, and achieve the safe and practical goal.

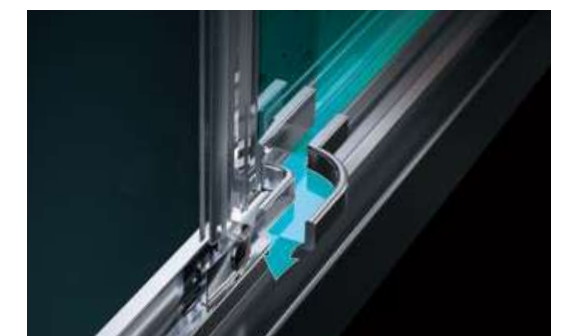

Buffer collision avoidance

SEAMLESS SEAL IS WATERTIGHT

Anti-oxidation adhesive strip, magnetic strip + customized water retaining edge + stone base seal triple seal design, precise fit with glass, frame profile, effectively prevent the overflow of water flow during bathing, creating a dry and wet separation bathroom environment.

FAUCET

CLEAN, ENJOY
HEALTH

FAUCET TECHNOLOGY

HEALTH, FROM THE INSIDE&OUTSIDE

Special A-grade refined environmental brass, which is molded by gravity, and the valve core imported from Hungary has no leakage for 500000 times; 10grade plating anticorrosion, as bright as new for long-time usage.

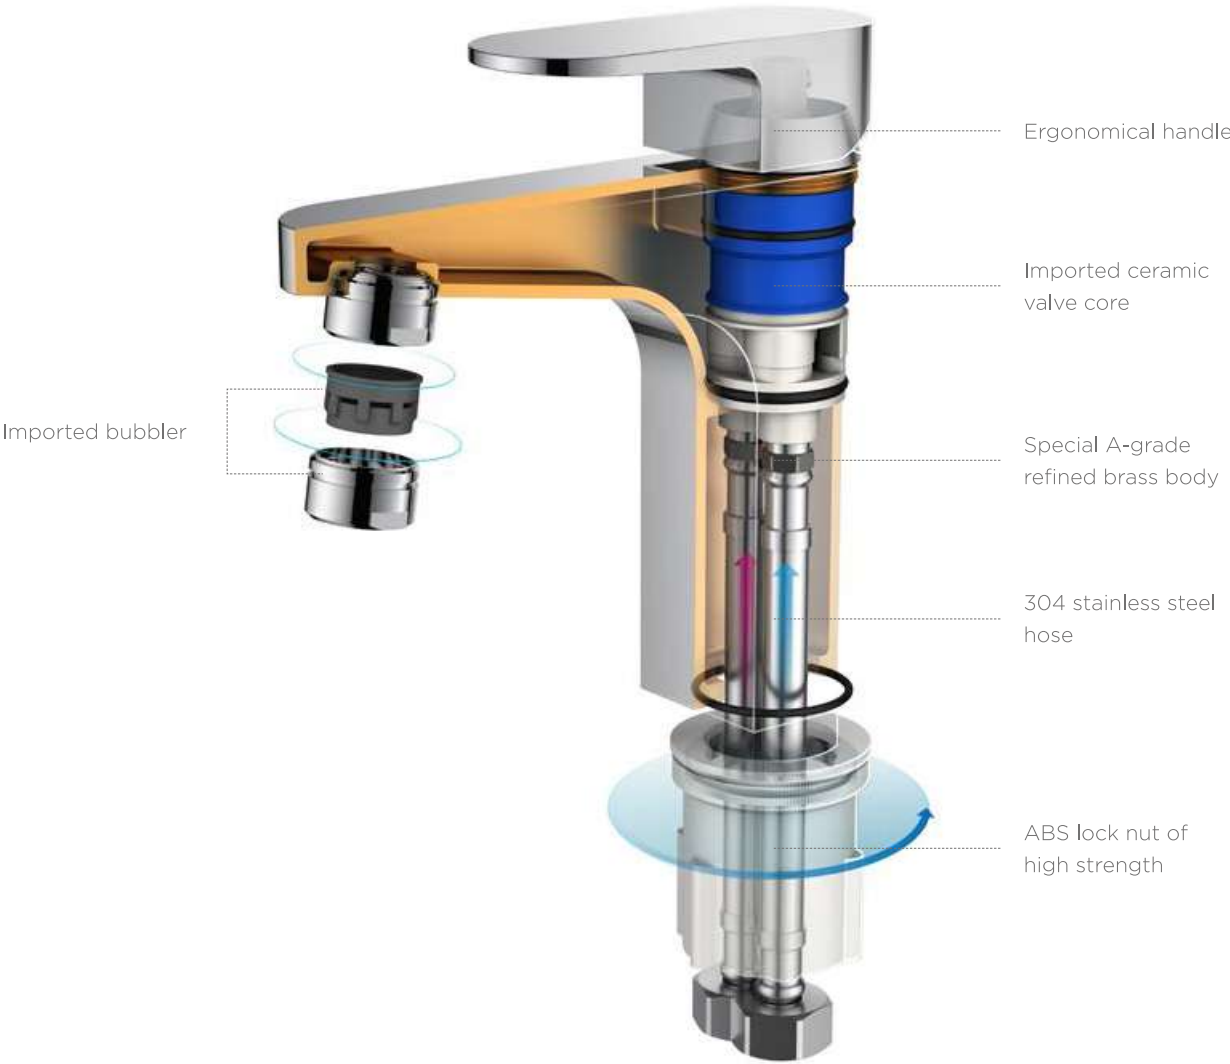

- 

Silent bubbler
- 

Integrated form
- 

Imported valve core
- 

Tests for 500000 times

IMPORTED VALVE CORE DO BETTER WITH "CORE"

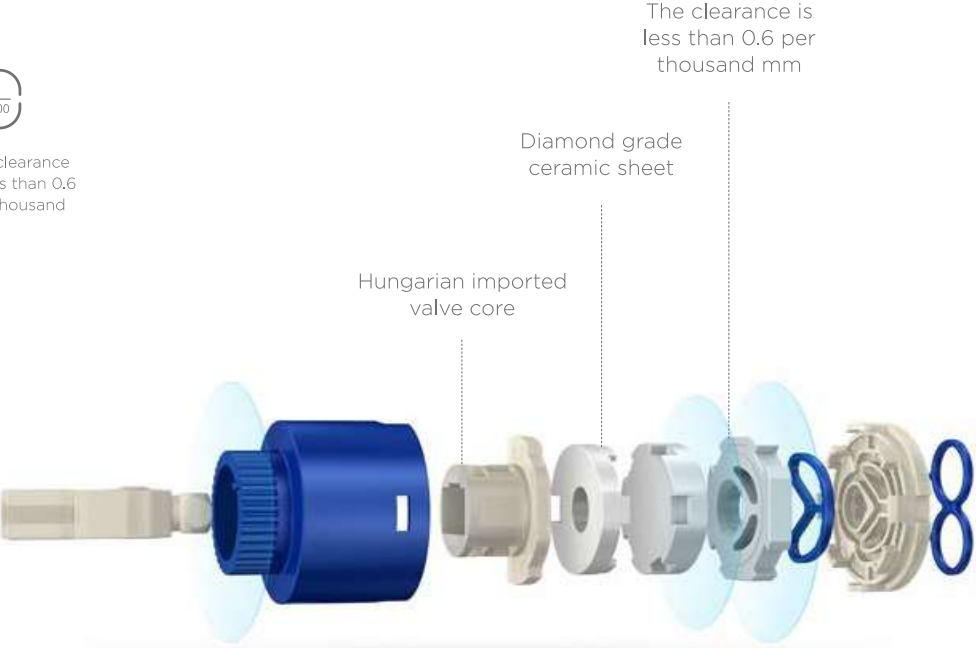

Hungarian imported valve core and diamond grade ceramic sheet are firm and wear-resisting, with perfect seal and smooth hand feeling.

- 

Imported valve core
- 

No leakage for 500000 times
- 

The clearance is less than 0.6 per thousand mm

IMPORTED BUBBLER OXYTROPIC MIXING WATER TECHNOLOGY

The imported Swiss NEOPERL bubbler, the oxytropic mixing water technology has gentle water outlet, and effectively save water of 30%; the embedded filtration device can filter the impurities in the water, for convenient maintenance and cleaning.

- 

Silent bubbler
- 

Oxytropic water
- 

Water saving of 30%

DORACOLORS

A perfect explanation of modern simplicity. Enjoy bath tenderness and quality life.
Vigorous design, unique personality and taste, revealing a life full of recreation and coziness.

PINK

Perfect proportion is the most attracting point of Pinkcollection. Pink tells the feel of high-end and elegant in concise style combines with the arcelement. On the premise of comfortable grip feeling, the ultimate thin handle machined with advanced technology gives a kind of unique experience.

SHOWER TECHNOLOGY

BE AT EASE WITH ENOUGH ROOM

Lift and rotate the shower head to easily adjust the use height, and the position clamping design, and durable spring device.

STORAGE SHELF

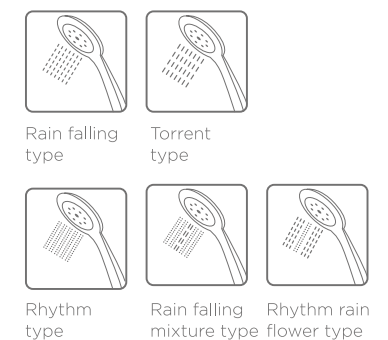

Anti-slip storage shelf can place bath supplies; the intimate hook can also hang the bath ball, to freely enjoy bath life.

SELF-CLEANING TOP SPRAY

The top spray self-cleaning can prevent water blockage and adapt to various water quality areas in the country.

MULTI-FUNCTIONAL WATER OUTLET

Rubber material is high temperature resistant, corrosion resistant and easy to clean. One-way flow limit can prevent backflow and various water outlet ways can enjoy various bathing.

360 DEGREE NO DEAD ANGLE SWINGING

The water outlet has 360-degree non dead angle swinging with more convenient water washing.

AIR-ENERGY SHOWER

AEROBIC, ENERGETIC

The oxytropic water flow has perfect fusion of 70% water + 30% air, the water outflow is soft and elastic, to enhance comfortable bath experience, saving water of 30%

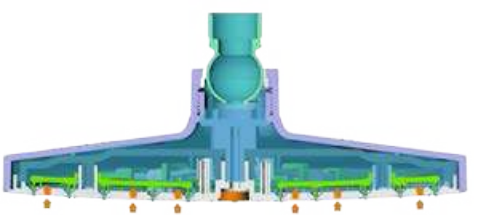

SELF-CLEANING TOP SPRAY

The top spray self-cleaning can prevent water blockage and adapt to various water quality areas in the country.

SHUTOFF WATER STATE

The cleaning needle presses downward with gravity to remove impurities in the water.

OPEN WATER STATUS

Use the water buoyancy to lift the cleaning needle and the shower head can have the normal water outflow.

MULTI-FUNCTIONAL HAND-HELD SHOWER HEADX

Medical silicone material is high temperature resistant, corrosion resistant and easy to clean. One-way flow limit can prevent backflow and various water outlet ways can enjoy various bathing.

EASY CONTROL TECHNOLOGY

Reasonably set the water outlet switch knob and key, to have smooth hand feeling, and can complete operation with single hand, for super convenient usage.

QUICK CLEAN TECHNOLOGY

The shower head nozzle made of green environmental protection medical silicone material is adopted to have the good tactility and high resilience, just gently stirring the water nozzle, the impurities and the dirt can be cleared automatically.

ANTIBACTERIAL TECHNOLOGY

The embedded anion filter element can effectively filter the impurities and bacteria that are accumulated in the water for years, purify the water quality, soften the water flow and provide a pleasant and healthy shower experience.

THERMOSTATIC SHOWER

38°C CONSTANT TEMPERATURE, EASY TO CONTROL

Huida Thermostatic shower head control system, anti-scald, locking safe water temperature to 38°C, prevent overheating of the water temperature from harm to the human body.

French imported valve core

38°C constant temperature
